Blood, Land and Power Manuel Perez-Garcia 2021-04-15 OPEN ACCESS The analysis of land management, lineage and family through the case study of early modern Spanish nobility from sixteenth to early nineteenth century is a major issue in recent historiography. It aims to shed light on how upper social classes arranged strategies to maintain their political and economic status. Rivalry and disputes between old factions and families were attached to the control and exercise of power. Blood, land management and honour were the main elements in these disputes. Honour, service to the Crown, participation in the conquest and ‘pure’ blood (Catholic affiliation) were the main features of Spanish nobility. This book analyses the origins of the entailed-estate (mayorazgo) from medieval times to early modern period, as the main element that enables us to understand the socio-economic behaviour of these families over generations. This longue durée chronology within the Braudelian methodology of the research aims to show how strategies and family networks changed over time, demonstrating a micro-history study of daily life.

The Routledge Companion to the Hispanic Enlightenment Elizabeth Franklin Lewis 2019-09-30 The Routledge Companion to the Hispanic Enlightenment is an interdisciplinary volume that brings together an international team of contributors to provide a unique transnational overview of the Hispanic Enlightenment, integrating both Spain and Latin America. Challenging the usual conceptions of the Enlightenment in Spain and Latin America as mere stepsisters to Enlightenments in other countries, the Companion explores the existence of a distinctive Hispanic Enlightenment. The interdisciplinary approach makes it an invaluable resource for students of Hispanic studies and researchers unfamiliar with the Hispanic Enlightenment, introducing them to the varied aspects of this rich cultural period including the literature, visual art, and social and cultural history.
Fuzzy Control of Queuing Systems

Runtong Zhang

2005-12-06

Every day we experience the annoyance of having to queue. The phenomenon is becoming more prevalent in our increasingly congested and urbanised society. Not only the visible queues in traffic jams, airport check in desks and supermarkets, but the more common invisible queues caused by voice calls and data packets in optical and wireless channels. Queues cost us time, money and resources; so what is the solution to our greater demand for services than there are facilities? Queuing control plays a crucial role in manufacturing and communication networks around the world. This pioneering approach, using fuzzy control to solve queuing control problems, determines explicit solutions to various types of control in queuing systems. The bulk of results have been developed over the past decade and are presented here together for the first time. 21 detailed case studies demonstrate an efficient departure from classical techniques. Unique work creating a new Research and Development topic. Multidisciplinary approach that will benefit researchers and students throughout the fields of artificial intelligence, operations research, optimal control, Internet techniques, communications and traffic control industries. Equipped with an extensive bibliography for easy reference and scope for further study. Existing practical problems, especially those that are unresponsive to conventional control techniques, are solved with the introduction of this novel approach. A systematic framework of the ‘fuzzy control of queuing networks’ is developed through each individual case.

**From Adam Smith to Michael Porter** Tong-s?ng Cho 2013 This book provides a thorough explanation of the evolution of international competitiveness theories and their economic and strategic implications. **Law and Globalization from Below** Boaventura de Sousa Santos 2005-09-08 This book is an unprecedented attempt to analyze the role of the law in the global movement for social justice. Case studies in the book are written by leading scholars from both the global South and the global North, and combine empirical research on the ground with innovative sociolegal theory to shed new light on a wide array of topics. Among the issues examined are the role of law and politics in the World Social Forum; the struggle of the anti-sweatshop movement for the protection of international labour rights; and the challenge to neoliberal globalization and liberal human rights raised by grassroots movements in India and indigenous peoples around the world. These and other cases, the editors argue, signal the emergence of a subaltern cosmopolitan law and politics that calls for new social and legal theories capable of capturing the potential and tensions of counter-hegemonic globalization.

**The Exercise of Public Authority by International Institutions** Armin Bogdandy 2010-02-11 The concept of global governance, which first emerged in the social sciences, has triggered different
responses in the discipline of law. This volume contains our proposal. It approaches global governance from a public law perspective which is centered around the concept of international public authority and relies on international institutional law for the legal conceptualization of global governance phenomena. This proposal results from a larger project which started in 2007. The project is a collaborative effort of the directors of the Max Planck Institute for Comparative Public Law and International Law, research fellows and friends of the Institute, as well as eminent members of the Law Faculty of the University of Heidelberg. Most of the materials contained in this volume were first published in the November 2008 - sue of the German Law Journal (http://www.germanlawjournal.com). We would like to express our sincere gratitude to the journal’s editors in chief, Professors Russell Miller (Washington and Lee University School of Law) and Peer Zumbansen (Osgoode Hall Law School, York University, Toronto), for the opportunity to publish our papers as a special issue of their journal. The 2008-2009 University of Idaho College of Law German Law Journal student editors deserve special recognition for their hard and diligent work during the publication process. At the Institute, Eva Richter, Michael Riegner and the editorial staff of this publication series were instrumental in bringing this publication to fruition.

Hard Choices, Soft Law
John J. Kirton 2017-03-02
An important read for academics and policy-makers alike, Hard Choices, Soft Law asserts that voluntary standards, or 'soft' law, are an important supplement to international law in a number of areas. This key work firstly outlines the approach taken to combining soft and hard law and trade, environment and labour values in the WTO and NAFTA, and in the prospective Millennium Round. Then, using the forestry sector - a realm where formal international law remains largely absent - the book provides a detailed examination of the role of soft law in action. It demonstrates how soft and hard law can be combined to promote trade, environmental and social cohesion, in ways that also permit sustainable development. The book presents a wealth of knowledge from a range of contributors familiar with the work of the G7/G8, the OECD, the Biodiversity Convention and the Codex Alimentarius.

Fighting for Political Freedom
Terence C. Halliday 2007-12-20
Across the world political liberalism is being fought for, consolidated and defended. That is the case for nations that have never enjoyed a liberal political society, for nations that have advanced towards and then retreated from political liberalism, for nations that have recently shifted from authoritarian to liberal political systems, and for mature democracies facing terrorism and domestic conflict. This book tests for the contemporary world the proposition that lawyers are active agents in the construction of liberal political regimes. It examines the efficacy of a framework that postulates that legal professions not only orient themselves to a market for their services but can frequently be seen in the forefront of actors seeking to institutionalise political liberalism. On the basis of some 16 case studies from across the world, the authors present a theoretical link between lawyers and political liberalism having wide-ranging application over radically diverse situations in Asia and the Middle East, North and South America, and Europe. They argue that it is not the politics of lawyers alone but the politics of a 'legal complex' of legally trained occupations, centred on lawyers and judges, that drives advances or retreats from political liberalism, that political liberalism itself is everywhere in play, in countries with established democracies and those without liberal politics and that it is now clear that the legal arena is a central field of struggle over the shape of political power. The case studies presented here provide powerful evidence that the
nexus of bar and bench in transitions towards or away from political liberalism is a force which has universal application.

**Lugubrious Nights** José Cadalso 2008 Lugubrious Nights follows the protagonist Tediato on his nightly visits to the temple where his beloved is interred. His ultimate intention is to disinter her body and kill himself in her presence. Tediato is a religious skeptic whose grief is cosmic, and he sees no reason not to join his beloved in death, torn as he is between the emptiness of his soul and the emptiness of the world. Hispanist Russell P. Sebold offers the first English translation of the eighteenth-century Spanish lyrical poem in prose by José de Cadalso (1741-1782). Inspired by his grief over the death of the actress María Ignacia Ibáñez, Cadalso composed Lugubrious Nights in 1771. Sebold considers it to be the first fully Romantic work of continental European literature, written three years before the publication of Goethe's *Werther*.

**Transplanting International Courts** Karen J. Alter 2017-04-06 Transplanting International Courts provides a deep, systematic investigation of the most active and successful transplant of the European Court of Justice. The Andean Tribunal is effective by any plausible definition of the term, but only in the domain of intellectual property law. Alter and Helfer explain how the Andean Tribunal established its legal authority within and beyond this intellectual property island, and how Andean judges have navigated moments of both transnational political consensus and political contestation over the goals and objectives of regional economic integration. By letting member states set the pace and scope of Andean integration, by condemning unequivocal violations of Andean rules, and by allowing for the coexistence of national legislation and supranational authority, the Tribunal has
retained its fidelity to Andean law while building relationships with nationally-based administrative agencies, lawyers, and judges. Yet the Tribunal's circumspect and formalist approach means that, unlike in Europe, Community law is not an engine of integration. The Tribunal's strategy has also limited its influence within the Andean legal system. Transplanting International Courts also revisits the authors' path-breaking scholarship on the effectiveness of international adjudication. Alter and Helfer argue that the European Court of Justice benefitted in underappreciated ways from the support of jurist advocacy movements that are absent or poorly organized in the Andes and elsewhere in the world. The Andean Tribunal's longevity despite these and other challenges offers guidance for international courts in other developing country contexts. Moreover, given that the Andean Community has weathered member state withdrawals and threats of exit, major economic and political crises, and the retrenchment of core policies such as the common external tariff, the Andean experience offers timely and important lessons for Europe's international courts.

**Considerations on Western Marxism** Perry Anderson
2016-02-23 This synoptic essay considers the nature and evolution of the Marxist theory that developed in Western Europe, after the defeat of the proletarian rebellions in the West and the isolation of the Russian Revolution in the East in the early 1920s. It focuses particularly on the work of Lukács, Korsch and Gramsci; Adorno, Marcuse and Benjamin; Sartre and
Althusser; and Della Volpe and Colletti, together with other figures within Western Marxism from 1920 to 1975. The theoretical production of each of these thinkers is related simultaneously to the practical fate of working-class struggles and to the cultural mutations of bourgeois thought in their time. The philosophical antecedents of the various school within this tradition—Lukácsian, Gramscian, Frankfurt, Sartrean, Althusserian and Della Volpean—are compared, and the specific innovations of their respective systems surveyed. The structural unity of 'Western Marxism', beyond the diversity of its individual thinkers, is then assessed, in a balance-sheet that contrasts its heritage with the tradition of 'classical' Marxism that preceded it, and with the commanding problems which will confront any historical materialism to succeed it.
